

To be assembled by an adult only

# Scooterboard

Please ensure that the foot is placed at the front of the footplate when scootering

**WARNINGS:** Protective equipment should be worn. MV recommends the use of helmet, knee and elbow pads when using this product.

Not for children with a body weight of more than 20kg.

The toy shall be used with caution, since it requires great skill, so as to avoid falls or collisions causing injury to the user and third parties.

Ensure all locking devices are engaged.

Running or jumping onto skateboards can be dangerous.

**NOT SUITABLE FOR CHILDREN UNDER 3 YEARS DUE TO SMALL PARTS.**

## SAFETY ADVICE

To be assembled by an adult only.

It is not intended or equipped for road use, off road use, racing, jumping, stunt riding or use with any motorised device.

Use on flat, clean and dry surfaces.

**IMPORTANT:** Do not modify the design of the scooter/skateboard as this may impair safety.

## FOR YOUR CHILD'S SAFETY

Recheck that all screws, nuts and bolts are firmly tightened. Self-locking nuts and other self-locking fixings may lose their effectiveness.

Make sure that your child is capable of riding this scooter.

Do not allow your child to ride unsupervised.

Use protective hand/wrist, knee and elbow pads, and a safety helmet when riding.

Remove any sharp edges created through use.

Check for splinters and cracks in the deck and replace if necessary.

If you have to replace any component, always replace with the appropriate spare part.

Check the trucks. Any nuts should be of the locking type with a minimum of two clear threads visible. The total axle should not project beyond the edge of the wheels, unless they are of the micro wheel type in which case the axle and means of securing the wheels shall not project beyond the deck.

Use a few drops of light machine oil to lubricate wheel bearing.

Product No. M02066

## CUSTOMER HELPLINE (UK ONLY) 0870 8404255

We make every effort to ensure that this product reaches you in satisfactory condition.

However if you have any queries, need assistance, or find this product defective, please call our Customer Helpline.

## ASSEMBLING THE SCOOTER

- 1 Straighten the handlebars up to the vertical position.
- 2 Release the quick-release mechanism (A). Push the handlebars down into the head tube as far as possible. Ensure the hinge is completely inserted into the head tube.
- 3 Tighten and lock the quick-release mechanism.

## ADJUSTING THE HANDLE HEIGHT

- 1 Release the quick-release mechanism (B).
- 2 Lift up or push down on the handlebars to adjust to the right riding height.
- 3 Tighten and lock the quick-release mechanism.

**NOTE:** The handlebars only fold one way. Folding the wrong way may result in damage to the handlebar stem.

When adjusting the height do not try to force the handlebars past the minimum and maximum positions.

Make sure the quick releases are tightened properly, so that the handlebars support the weight of the rider. To tighten any quick-release mechanisms, open the lever, finger tighten the screw to the required tension and close the lever.

## RELEASING THE SKATEBOARD

- 1 Lift the skateboard release button and slide the scooter head out of the skateboard connecting tubes.

## ATTACHING THE SKATEBOARD

- 1 Slide the scooter head partway into the skateboard connecting tubes.
- 2 Lift the skateboard release button and slide the scooter head the rest of the way into the skateboard connecting tubes. Check the scooter insertion mark is against the skateboard connecting tubes.
- 3 Check the scooter head and skateboard are securely fixed and clicked into place before riding.

## SKATEBOARD SAFETY CODE

- 1 Choose to skateboard in places which allow you to improve your skills, not on pavements or streets where serious accidents have happened to skateboarders and other people.
- 2 Children under eight years of age should be supervised at all times when skateboarding.
- 3 Learn everything slowly, including new tricks. When losing balance don't wait until you fall, step off and start again. Ride down gentle slopes at first, then ride slopes where your speed is only as fast as you can run off the board without falling.
- 4 Most serious skateboard injuries are broken bones, so learn to fall (by rolling if possible) without the skateboard first.
- 5 Skateboarders starting to learn should try with a friend or parent. Most bad accidents happen in the first month.
- 6 Before you jump off a skateboard watch where it may go, it could injure someone else.
- 7 Avoid skateboarding on wet or uneven surfaces.
- 8 Join a club in your area and learn more. Prove you are a good skateboarder and care about yourself and others.

## A GUIDE TO SAFE CYCLING & SCOOTERING

- 1 We recommend this scooter is for pavement use only.
- 2 Do not ride at night. Visibility is often limited at dawn and dusk.
- 3 Always give pedestrians right-of-way, and don't ride too close to them. Never park your bicycle or scooter where it can cause a nuisance.
- 4 Avoid hazards that may cause you to lose control of your bicycle or scooter such as pot holes, uneven pavements and manhole covers.
- 5 Leave plenty of room when passing parked vehicles and watch out for doors being opened in your path.
- 6 Remember that braking distance should be increased in wet weather, and regular checks of brakes, steering and lighting should be made.
- 7 Never carry passengers on your bicycle or scooter. Never carry packages in your hands while riding, or fix anything to your bicycle or scooter that could obstruct your visibility or control.
- 8 Don't wear anything that restricts your hearing.
- 9 Always ride with both hands on the handlebars.
- 10 Don't wear very loose clothing, which could hang down and become caught in the wheels. Wear cuff bands or trouser clips to keep your trousers from getting caught in the chainwheel.
- 11 We recommend that light-coloured or fluorescent clothing be worn which helps others to see you in daylight and poor light.
- 12 Always wear proper safety equipment. We recommend a helmet, long-sleeved shirt, long trousers, shoes, elbow pads and knee pads. Gloves and eye protection also make good sense. Cover your handlebars, stem and top tube with safety pads for extra protection.
- 13 Don't ride your bicycle if the chain cover is not attached.

**Please refer to the Highway Code regarding rules for cyclists**
