IMPORTANT: Before you assemble this swing it is important that you read the safety warning below and then follow the assembly instructions carefully. Please keep these instructions in a safe place for future reference.

⚠️ SAFETY WARNING

This item MUST be assembled by adults. This swing is not suitable for children over 36 months due to its dimensions and characteristics. This product must be used under the direct supervision of an adult. This item is intended for indoor or outdoor use. It should be situated on a level surface at least 2 metres away from any structure or obstruction, such as a fence, garage, house, overhanging branches, laundry lines or electrical wires. Do not install the item over concrete or other hard surfaces - use only on a soft flat surface, which will reduce the risk of injury from falls. Outdoor use: use on a grassed area away from hard surfaces and keep clear of all garden furniture or objects. Indoor use: use on a carpet area away from furniture, toys and other objects that could cause injury. Ensure children do not wear loose clothing that could snag on the equipment, such as baggy pockets or hoods. When used outdoors, position the swing so that the child will not be dazzled by the sun. This product is not intended for children weighing more than 25 kg. Only allow one child per time on the swing, and keep other children from wandering in front of or behind the swing when it is in use. Always ensure the child wears the seat harness when using the swing. Never use the swing when the frame is folded up. Because this item is not anchored down, to ensure stability of the product do NOT let the seat swing too high.

Before Assembly: Keep all components out of the reach of young children. Dispose of all packaging safely.

Before first use and at regular intervals throughout the play season: Check the suspension system and all fixings and tighten or replace if necessary - if these checks are not undertaken regularly, components could loosen and cause injuries. Check for any sharp edges or points, and if any are found replace the component concerned. Check the rope and seat for signs of damage and discontinue use if any is found. If any part of the swing shows signs of deterioration phone our consumer services department for advice.

During Use: ensure your child does NOT:- Twist the ropes Place the ropes over the top beam Swing sideways Climb onto the frame Stand on the seat Dismount whilst the swing is moving

After Use: fold up, as per the instructions. Store indoors during the winter.

This item is for family domestic use only and is not intended for public use in playgrounds, parks, etc...

In case of difficulties in assembling this item or if parts are missing, DO NOT return the item to the store but contact our helpline number below.

GARANTEE

The metal framework of this nursery swing is guaranteed by Pot Black Limited, for a period of 3 years from the date of purchase against failure due to rust perforation. Rust perforation is defined as rusting-through of metal tubes due to rust corrosion from the 'inside out'. Plastic components and ropes are guaranteed for a period of 1 year from the date of purchase. We take every precaution to ensure that this item is in good condition upon receipt. However, very occasionally parts do get damaged or are missing. Should this be the case with your purchase, please telephone our helpline number. Any defective part or parts will be replaced free of charge. This guarantee is subject to the product having been used for the purpose for which it was designed, and assembled and maintained in accordance with these instructions. This guarantee does not cover any damage caused by storms, fire or floods, or by neglect or misuse. Any repairs or alterations carried out could also invalidate this guarantee. Please retain this guarantee and staple your receipt (your proof of purchase) to these instructions for future reference. This guarantee does not affect or prejudice any statutory rights you may have. Please contact our Consumer Services Department regarding any query or claim on this guarantee. Any claim under this guarantee must be notified to our Consumer Services Department within 30 days of discovery of the defect.

Consumer Services Dept, Pot Black Limited, Alverdiscott Road, Bideford, Devon, EX39 4PN. UK.

BEFORE YOU START

This nursery swing must be assembled by an adult, perhaps with another adult to help. Taking time over the assembly helps to ensure safety. You should allow about an hour to complete the job. We recommend that you check all the parts against the Parts List before starting. Do this by laying them out on a flat surface - but not on grass, as small items can easily be lost. Dispose of the plastic bags carefully. If you have any problems queries or concerns, contact our helpline number (shown on the front and back pages).

CARE OF YOUR NURSERY SWING

Do not use pliers to tighten up the nuts and bolts - these can cause damage. Please note that the guarantee against rust perforation does not cover rust due to scratched or chipped paintwork. Check the paintwork regularly and if necessary touch up using a non-toxic enamel-type paint (available from good DIY stores). We regret we cannot supply paint as the type we use is only suitable for machine application. Regularly check the ropes, seat, suspension system and other parts for any signs of wear or damage, removing the item from use when necessary until replacement parts have been fitted. Only use Hedstrom parts on this product - use of non-Hedstrom parts may invalidate any guarantees made by us and may also result in product failure. Any replacement parts can be obtained by calling our Consumer Services Department.

To help maintain the product's appearance, occasionally lightly clean the seat and frame with a damp cloth - but do not use abrasive or chemical cleansers.

PARTS LIST

- 47mm socket head M6 bolt x 2
- 40mm socket head M6 bolt x 2
- 35mm socket-head bolt x 4
- 25mm socket-head bolt x 2
- domenut x 8
- washer x 18
- Spring washer x 8
- fixing knob x 2
- Locknut x 2
- plastic pin x 2
- spanner x 1
- socket wrench x 1
- seat x 1
  (folded down and pre-assembled to the top bars, and ready-fitted with harness, side walls and ropes)
- top leg section x 4
- bottom leg section x 4
- side bar plain section x 2
- side bar section x 2
1. Carefully fold over the seat arm rest and then fold down the seat as shown in the diagrams. This must be done carefully as all the ropes and seat side-walls are pre-attached. Make sure all of the ropes hang down properly and are not twisted together. You will see there is a knot in the upper part of the front ropes - leave this alone for the time being. **ON NO ACCOUNT MUST YOU UNDO ANY ROPES OR NUTS AND BOLTS.**

2. With the seat fully folded down and after checking all the ropes are hanging correctly, insert a plastic pin into the bottom hole on each side of the back-rest, as shown. Push the pins in firmly until they fit fully into the back-rest. Leave the knots in the upper part of the front ropes alone for the time being.
3. Fit an upper leg section into each end of both top bars, align the holes, then fix together using 35mm bolts, washers, spring washers and domenuts exactly as shown. Tighten the nuts up firmly, but take care not to overtighten.

4. Make sure the domenut is on the same side as the knob. Tighten firmly - but do not overtighten.

5. Tighten firmly so that the bolt protrudes from the end of the locknut, then fit the front of the side bar onto the exposed bolt and attach it using the knob as shown. Tighten up the knob.
6. Now make sure the arm-rest is fully down and the ropes are taut, then loosen the knots in the upper front ropes and move them down until they are directly against the top of the arm-rest as shown and then tighten them up.

7. To fold the frame up after use, unscrew each knob, lift the front of the side bar off the bolt, then fold the frame up. NEVER use this item when it is folded up, or the side bars are not held to the frame with the knobs.

8. ALWAYS make sure the seat harness is used. The harness straps fit together as shown. Tighten the harness by using the buckles. To unhook the harness, gently pull the clips outwards and pull out the straps, as shown.

ONCE ASSEMBLY IS COMPLETED... Before allowing children to play on this product, carefully check the equipment for any sharp edges and points. In the unlikely event that you do find any, please call our helpline number below. Do not allow children to use this product until the problem has been corrected.
