SAFETY GUIDELINES

WARNING: Only one child at a time. Maximum weight 30kg.
Not suitable for children under three years, contains small parts and long elastic.
Adult supervision is required at all times.
This equipment must be assembled and checked by an adult.
Two adults may be required for assembly.
Suitable for indoor and outdoor use.
Please retain complete instructions for future reference.
Leave all fittings finger tight until assembly is complete, for ease of construction then tighten firmly.
Do not allow loose, hooded or baggy clothes to be worn since children can get trapped and may be unable to free themselves.
Do not allow more than one child on the equipment at any one time.
Do not allow children on the equipment on any parts not intended for this purpose.
Do not position equipment on hard or abrasive surfaces such as tarmac or gravel. Position on soft ground, ideally grass away from hazardous obstructions which will reduce the risk of injury from falls.
Place the product on level surface at least 2 metres from any structures, obstructions or obstacles such as fences, walls, overhanging branches, laundry lines, electrical wires, ponds, power lines, bushes or buildings.
Bounce on mat only when dry.
Do not orientate trampoline directly towards the sun.
Check regularly all nuts, bolts and fittings for tightness and tighten if required. Failure to do so could result in injury.
Check all coverings for bolts and sharp edges and replace when required.
Do not attempt or allow somersaults. Landing on head or neck can cause very serious injury.
Please keep this information for reference.
Made in China to European Standards.

CUSTOMER SERVICES
MV has taken great care to ensure that this toy has reached you in good condition. Should you have a query, please contact: customer.services@mvsports.com where your query will be dealt with promptly. Alternatively, you can call 0870 8404255.

TRAMPOLINE PARTS LIST

JUNIOR TRAMPOLINE - MO8681
FOR CHILDREN AGED 3+ YEARS

1. Handle Side x 2
2. Leg Tube x 4
3. Elastic Cord x 1
4. Printed Mat x 1
5. Handle tube
6. Sleeve x 1
7. Hook x 1
8. Spanner x 1
9. Allen Key x 1
10. Long Bolt x 4
11. Short Bolt x 4

IMPORTANT: Make sure you read the safety notice on the front page and always supervise children while they are playing on the equipment. Once assembly is completed carefully check equipment. In the unlikely event that you do find any problems, please contact us. Do not allow children to use this product until the problem has been corrected.
**STEP 1**
Leg Assembly

- 4 Short Bolt
- 1 Spanner
- 1 Allen Key

**STEP 2**
Handle Assembly

- Ensure both spring clips lock into place when you fit poles 1 and 5 together

**STEP 3**
Legs & Handle Assembly

- 4 Long Bolt

**STEP 4**
Mat Assembly

Threading - Mat
Starting at one corner, thread the elastic cord around the legs and up through two mat eyelets as shown, ensuring that both lengths of the elastic cord are of equal length. Please note that two adults may be required to pull the elastic cord around the trampoline frame.

First Corner
Start threading elastic cord to frame, ensuring the elastic cord is as tight as possible.

Middle Changeover
Change threading pattern after eyelet 2 by taking the elastic cord around the leg tube and pushing it down through eyelet 3 and around leg tube. Repeat until side is threaded.

Second Corner
When eyelet 5 is reached thread the elastic cord around the corner as shown and repeat until remaining three sides are threaded.

Hooking The Elastic Cord
A. When both ends of the elastic cord have threaded the last eyelet, push the flexible plastic sleeve over the end and thread the metal hook through the eyelet in the elastic cord.
B. Wrap it around 2 times with the hook facing inwards and positioned underneath the mat.
C. Hook on the other side of the elastic cord and cover the joint with the plastic sleeve.
D. For safety reasons, the elastic cord must be wrapped around the final leg two times.

Please take care when hooking the elastic cord around the final leg of the frame, as tension in the elastic cord will be high.
STEP 5
Aligning The Trampoline

The trampoline mat and frame may need to be re-centred and re-aligned upon hooking the elastic around the trampoline legs due to high tension in the elastic.

- Please ensure the gap between the mat and the frame is equal on all four sides by loosening or tightening the cord where appropriate.

- If necessary please realign the frame by pushing the two opposing corner legs in an inwards direction to make the frame even.
